MEASURE THE ANGLE

PROCEDURE

Using the prepared protractor, place the plane mirror so that its reflecting surface is on the line MN.

Using a single ray of light, start at O and position the light box at various angle between O and M. The angle between OX and the incident ray is called the incident angle and is recorded in a table of results. The angle of reflection (the angle between OX and the reflected ray) is also recorded.

CONCLUSION

RESULTS

ANGLE OF INCIDENCE	ANGLE OF REFLECTION
