

YEAR 9 SCIENCE
PHYSICAL SCIENCES
REVISION - TEST 1

1. (a) How do the particles move in a **transverse wave**? Give an example of this wave.

up + down  → energy light

- (b) How do the particles move in a **longitudinal wave**? Give an example of this wave.

backwards + forwards  → energy sound.

- (c) Draw a displacement - distance graph to show the following. Make sure you give appropriate scales and labels.

2. (a) How would you describe **light** - what is it?

• Pure energy. • Electric + magnetic fields together.

- (b) Does light need a medium (substance) to travel in? How do you know?

No - can travel in space.

3. (a) List the parts of the electromagnetic spectrum in order.

power radio TV micro IR γ UV x-ray δ -ray

- (b) Give a use or characteristic for each part.

electricity comm. cooking heat see ↓ medical medical
growth of plants cancer treatment.

4. (a) What are the Laws of Reflection?

$$\angle \text{incidence (i)} = \angle \text{reflection (r)}$$

- (b) Draw a simple diagram to show it.

5. What is the difference between a **real image** and a **virtual image**?

Real image - can show on a screen.

Virtual image - can't show on a screen.

6. Complete the following ray diagrams.
