

Ecosystems: Puzzles

Answers

1. Work out the answer to each of the following. Check your answer in the Key list below. Use the Key list to discover a letter for the mystery word. Write this letter in the spaces below to determine the mystery word.

- Name the method used to measure population numbers in a given area. **Quadrat**
- Air temperature is an example of what type of environmental factor? **Abiotic**
- Competition is an example of what type of environmental factor? **Biotic**
- What is the source of energy for most ecosystems? **Sun**
- What name is given to the conversion of glucose into energy? **Respiration**
- Name the animals that feed off plants. **Herbivores**
- Name the organisms that break down dead remains. **Decomposers**
- Name the process in which water is lost from plant leaves. **Transpiration**
- What type of bacteria converts ammonia into nitrates? **Nitrifying**

Key list:

T = transpiration

I = abiotic

N = nitrogen

G = geothermal

R = recapture

V = biotic

D = quadrat

S = herbivores

O = osmosis

E = sun

I = decomposers

P = photosynthesis

C = consumer

Y = nitrifying

R = respiration

O = oxygen

Mystery word:

1	2	3	4	5	6	7	8	9
D	I	V	E	R	S	I	T	Y

2. Each set contains letter sequences of three words about Ecology. Unscramble the letter sequences to discover the three words:

DE CLE TEM OD CY OS RA BI RE YS EC EG

Answer: **BIODEGRADE** **RECYCLE** **ECOSYSTEM**

3. In the grid are two words related to the topic Ecology. The letters of each word follow sequentially as you move around the grid. Identify the words.

A	L	L
R	C	O
E	O	R
F	N	T

Words: **FERAL** **CONTROL**
