

Name:	<u>Solutions.</u>		Date: _____
Teacher :	_____		
	Year 12 Foundation Task 3: Test 1		/21
	<u>Full working out MUST be shown to get full marks for each question.</u>		
Total Time:	40 minutes		
Weighting:	6%		
Equipment:	To be provided by the student: Pen, pencil, ruler, scientific calculator		

1. For each of the following questions, decide which operation you would use to solve the problem and then work out the answer:

Question	Operation (X + ÷ or -)	Working out and answer
A group of 5 friends go to a restaurant and decide to split a \$150 bill equally between them. How much do they each pay?	÷ ✓	$\begin{array}{r} 30 \\ 5 \overline{)150} \\ \underline{150} \\ 0 \end{array} = \30 each. ✓
In Watertown Brand Outlet, a top originally cost \$56 but there is a saving of \$17. What is the new price?	- ✓	$56 - 17 = 39$ $\$39$ ✓
For a Fremantle Dockers away game, 16 buses of 52 people each travel to the game. How many people in total?	× ✓	$16 \times 52 = 832$ ✓
In Hungry Jacks, it costs \$5.95 for a super stunner meal and \$0.60 to "go large". What is the total cost for a large meal?	+ ✓	$5.95 + 0.60 = \$6.55$ ✓

(8 marks)

2. Mrs Wood goes shopping to Woolworths. In her head, she estimates the bill to be \$21 for a family of 3 for a week of groceries (food shopping).

a) Is this a "reasonable" answer? Or has Mrs Wood made a mistake? Explain your reason.

(2 marks)

Unreasonable.

$$21 \div 3 = \$7.$$

$$\$7 \div 7 = \$1$$

\$7 per person for the week.

\$1 per day.

3. A group of 4 friends go on a road trip (in one car). In total they use 175 litres of fuel costing \$1.50 per litre. Calculate how much each person has to pay to the nearest 5c.

Show your method.

(3 marks)

$$\begin{aligned} 175 \times 1.50 &= \$262.50 \quad \checkmark \\ 262.50 \div 4 &= 65.625 \quad \checkmark \\ 65.625 &\approx \$65.65 \quad \checkmark \end{aligned}$$

4. The following calculation has a mistake in it. Circle any mistakes and write the correct method underneath.

I wanted to work out the total cost of 5 cookies at \$3 each and 3 bottles of Coca-Cola at \$2 each.

$$5 \times 3 = 5 \times 2$$

$$15 \times 10 = \underline{\$150}$$

a number of mistakes.

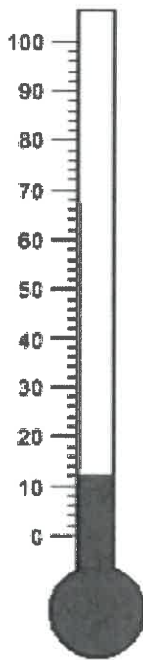

$$\begin{aligned} 5 \times 3 + 3 \times 2 \\ 15 + 6 \quad \checkmark \\ = \$21. \quad \checkmark \end{aligned}$$

(3 marks)

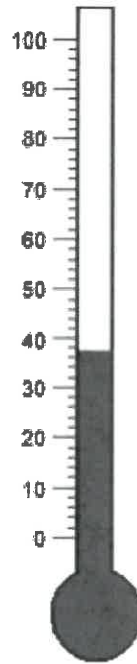

5.

Minimum Temperature Perth

°C

Maximum Temperature Perth

°C

(a) Write the minimum temperature in degrees Celsius.

12° ✓

(b) Write the maximum temperature in degrees Celsius.

37° ✓

(c) What is the range of temperature for that particular day?

$37 - 12 = 25^\circ$ ✓ ✓

(d) What season would you likely expect this range of temperatures in Perth.

late spring
or summer
or early Autumn ✓

5 marks (1, 1, 2, 1)

any acceptable.

END OF TEST
