Teacher Directions:

To use this maze activity you will need to make a copy of the maze for each student. Students will complete the problems on a separate piece of paper or a small whiteboard. After they complete each question they will look for the path that has the correct answer on it. They will then move through that arrow to the next question. They will keep doing this from the start space to the finish space. If they make a mistake they will have to go back to the mistake and continue from there.

About this Resource:

Use this resource to review multiplying and dividing integers. The first maze is multiplying integers, the second is dividing integers, and the third is a mix of the two.

Included in this resource:

- 3 mazes
- Answer keys

Tips and Variations :

- Use the maze in a dry-erase sleeve or page protector to save paper.
- Have students race against each other or against their best time.
- Students can use a highlighter to show their path.
