

Interpreting Data

Two-Way Tables Task Cards with QR Codes*

COMMON
CORE
ALIGNED!

1

In a survey in Springfield, citizens were asked whether they vote "yes" or "no" to build a new playground at the park. The table shows the results.

Vote	Male	Female	Total
Yes	35	50	85
No	10	17	27
Total	45	67	112

Of the yes votes, what percent (to the nearest percent) came from males?

20

An 8th grade teacher surveyed her students to see who liked Chick-Fil-A and who liked Zaxby's. The results of the survey are in the table below.

	Chick Fil A	Zaxby's	Total
Boys	35	17	52
Girls	13	35	48
Total	48	52	100

If a boy is chosen from the set of boys at random, what is the probability that he likes Zaxby's?

- A.) 17%
- B.) 35%
- C.) 33%
- D.) 100%

3

A survey was conducted on whether a student had a curfew and if they had a cell phone. The results are shown below.

	No Curfew	Curfew	Total
Cell Phone	5	15	20
No Cell Phone	20	12	32
Total	25	27	52

What is the relative frequency of students who do not have cell phones or a curfew to the total number of students surveyed?

GREAT
FOR MATH
CENTERS!

*Set without QR Codes included!

Two-Way Tables Task Cards

Teacher Instructions

- Print the following Task Cards out. There are two sets-one with QR Codes and one set without the QR Codes.
 - Cut out each card (laminates if you want to for continued use!)
 - You can use the Task Cards in Math Centers for small group instruction, or you can post in various places in the classroom to complete in random order. My students love using their technology devices to scan the QR codes to get immediate feedback on their answers. You can also hole punch the corner of the cards and put together with a binder ring for individual use for those students who may need extra practice.
 - I also print out the Answer Key for Students to check their work if they do not have a technology device with QR scanning capability.
- *There are many free QR code scanners available to download in app stores! You do not need internet access to scan the codes!

Two-Way Tables Task Cards

Teacher Tips

- I like to use these for remediation in small groups or individually. You can also have students work with partners to increase peer tutoring.
- If you fear students will scan the code and write down the answers, print the Cards without the QR Codes. I tell my students at the beginning that it is not the answer I care about-it's do you know how to get there? I print multiple copies of the answer key to place around the room. The students know that this is a self-checking activity. If they cannot figure out the answer they come and ask me for help. This helps build their confidence!

Please let me know if you have any questions!

Thank you for your purchase and feedback!

I hope you and your students enjoy! Happy Teaching!

Two-Way Tables Task Cards

Student Instructions

- Answer each problem on the Task Card
- Write your answer on the Answer Document in the correct box.
- You must show all your work if needed!
- Scan the QR Code to check your answer.

Two-Way Tables Task Cards

- The following Task Cards are:
 - Black and White for easy copying.
 - with QR Codes for immediate feedback and answers!

1

In a survey in Springfield, citizens were asked whether they voted “yes” or “no” to build a new playground at the park. The table shows the results.

Vote	Male	Female	Total
Yes	35	50	85
No	10	17	27
Total	45	67	112

Of the yes votes, what percent (to the nearest percent) came from males?

2

In a survey in Springfield, citizens were asked whether they voted “yes” or “no” to build a new playground at the park. The table shows the results.

Vote	Male	Female	Total
Yes	35	50	85
No	10	17	27
Total	45	67	112

Of the female votes, what percent (to the nearest percent) were no votes?

3

The data below show the number of t-shirts sold at a high school.

	Navy	Red
Small	10	15
Medium	32	20
Large	8	3

What is the relative frequency of navy t-shirts sold?

4

The data below show the number of t-shirts sold at a high school.

	Navy	Red
Small	10	15
Medium	32	20
Large	8	3

What is the relative frequency of red t-shirts sold to navy t-shirts?

5

The data below show the number of t-shirts sold at a high school.

	Navy	Red
Small	10	15
Medium	32	20
Large	8	3

What is the relative frequency (to the nearest percentage) of the Medium sized t-shirts that are red?

6

Students at a middle school were asked what their favorite subject was and if they were in the 7th or 8th grade. The results are shown below.

	7 th	8 th	Total
English	32	10	42
History	12	24	36
Math	62	73	135
Science	17	45	62
Total	123	152	275

Which of the following statements is best supported by the data in the table?

- A.) 8th grade students are most likely to prefer English as their favorite subject.
- B.) Of the students whose favorite subject is history, there is a higher frequency of 7th graders than 8th graders.
- C.) Of the students whose favorite subject is math, there is a lower frequency of 7th graders than 8th graders.
- D.) 7th grade students are most likely to prefer Science as their favorite subject.

7

The table below shows the number of rich and poor people in Arkansas and Kansas.

State	Rich	Poor
Arkansas	402	610
Kansas	375	427

What percentage (to the nearest percent) of people in Arkansas are rich?

8

The table below shows the number of rich and poor people in Arkansas and Kansas.

State	Rich	Poor
Arkansas	402	610
Kansas	375	427

Of the people surveyed, what is the relative frequency that are poor?

9

College students were surveyed if they were Math or Science majors and if they used an iPad for class. The results are shown below.

Major	Yes iPad	No iPad
Math	200	150
Science	320	100

What percentage of students use an iPad for their class work?

10

College students were surveyed if they were Math or Science majors and if they used an iPad for class. The results are shown below.

Major	Yes iPad	No iPad
Math	200	150
Science	320	100

What percentage of students who major in Math do not use an iPad?

11

A survey of students in a class explored the relationship between gender and if they watched this year's Super Bowl.

	Watched the Super Bowl	Did Not Watch the Super Bowl	Total
Boys	14	5	19
Girls	8	13	21
Total	22	18	40

If a girl is chosen from the set of girls at random, what is the probability that she watched the Super Bowl?

- A.) 40%
- B.) 20%
- C.) 38%
- D.) 8%

12

A survey of students in a class explored the relationship between gender and if they watched this year's Super Bowl.

	Watched the Super Bowl	Did Not Watch the Super Bowl	Total
Boys	14	5	19
Girls	8	13	21
Total	22	18	40

If a boy is chosen from the set of boys at random, what is the probability that he watched the Super Bowl?

- A.) 35%
- B.) 74%
- C.) 14%
- D.) 50%

13

A survey of students in a class explored the relationship between gender and if they watched this year's Super Bowl.

	Watched the Super Bowl	Did Not Watch the Super Bowl	Total
Boys	14	5	19
Girls	8	13	21
Total	22	18	40

Which is a reasonable conclusion to draw from this data?

- A.) There are more people in the class that did not watch the Super Bowl than those that did watch the Super Bowl.
- B.) Among the boys, there are more people who did not watch the Super Bowl than those who did watch the Super Bowl.
- C.) Among the girls, there are more people who watched the Super Bowl than those who did not watch the Super Bowl.
- D.) The probability that a boy chosen from the class watched the Super Bowl is greater than the probability that a girl chosen from the class watched the Super Bowl

14

A survey was conducted on whether a student had a curfew and if they had a cell phone. The results are shown below.

	No Curfew	Curfew	Total
No Cell Phone	5	15	20
Cell Phone	20	12	32
Total	25	27	52

What is the relative frequency of students who have cell phones and a curfew to the total number of students surveyed?

15

A survey was conducted on whether a student had a curfew and if they had a cell phone. The results are shown below.

	No Curfew	Curfew	Total
No Cell Phone	5	15	20
Cell Phone	20	12	32
Total	25	27	52

What is the relative frequency of students who do not have cell phones or a curfew to the total number of students surveyed?

16

A survey was conducted on whether a student had a curfew and if they had a cell phone. The results are shown below.

	No Curfew	Curfew	Total
No Cell Phone	5	15	20
Cell Phone	20	12	32
Total	25	27	52

Of the students who have cell phones, are they more likely to also have a curfew? (yes or no)

17

An 8th grade teacher surveyed her students to see who liked Chick-Fil-A and who liked Zaxby's. The results of the survey are in the table below.

	Chick-Fil-A	Zaxby's	Total
Boys	35	17	52
Girls	13	35	48
Total	48	52	100

What is the relative frequency of boys who liked Chick-Fil-A to girls who liked Chick-Fil-A?

18

An 8th grade teacher surveyed her students to see who liked Chick-Fil-A and who liked Zaxby's. The results of the survey are in the table below.

	Chick-Fil-A	Zaxby's	Total
Boys	35	17	52
Girls	13	35	48
Total	48	52	100

What is the relative frequency of girls who liked Zaxby's and the total number of girls?

19

An 8th grade teacher surveyed her students to see who liked Chick-Fil-A and who liked Zaxby's. The results of the survey are in the table below.

	Chick-Fil-A	Zaxby's	Total
Boys	35	17	52
Girls	13	35	48
Total	48	52	100

If a girl is chosen from the set of girls at random, what is the probability that she likes Chick-Fil-A?

- A.) 13%
- B.) 27%
- C.) 35%
- D.) 50%

20

An 8th grade teacher surveyed her students to see who liked Chick-Fil-A and who liked Zaxby's. The results of the survey are in the table below.

	Chick-Fil-A	Zaxby's	Total
Boys	35	17	52
Girls	13	35	48
Total	48	52	100

If a boy is chosen from the set of boys at random, what is the probability that he likes Zaxby's?

- A.) 17%
- B.) 35%
- C.) 33%
- D.) 100%

Two-Way Tables Task Cards

- The following Task Cards are:
 - Black and White for easy copying.
 - WITHOUT QR Codes

1

In a survey in Springfield, citizens were asked whether they voted “yes” or “no” to build a new playground at the park. The table shows the results.

Vote	Male	Female	Total
Yes	35	50	85
No	10	17	27
Total	45	67	112

Of the yes votes, what percent (to the nearest percent) came from males?

2

In a survey in Springfield, citizens were asked whether they voted “yes” or “no” to build a new playground at the park. The table shows the results.

Vote	Male	Female	Total
Yes	35	50	85
No	10	17	27
Total	45	67	112

Of the female votes, what percent (to the nearest percent) were no votes?

3

The data below show the number of t-shirts sold at a high school.

	Navy	Red
Small	10	15
Medium	32	20
Large	8	3

What is the relative frequency of navy t-shirts sold?

4

The data below show the number of t-shirts sold at a high school.

	Navy	Red
Small	10	15
Medium	32	20
Large	8	3

What is the relative frequency of red t-shirts sold to navy t-shirts?

5

The data below show the number of t-shirts sold at a high school.

	Navy	Red
Small	10	15
Medium	32	20
Large	8	3

What is the relative frequency (to the nearest percentage) of the Medium sized t-shirts that are red?

6

Students at a middle school were asked what their favorite subject was and if they were in the 7th or 8th grade. The results are shown below.

	7 th	8 th	Total
English	32	10	42
History	12	24	36
Math	62	73	135
Science	17	45	62
Total	123	152	275

Which of the following statements is best supported by the data in the table?

- A.) 8th grade students are most likely to prefer English as their favorite subject.
- B.) Of the students whose favorite subject is history, there is a higher frequency of 7th graders than 8th graders.
- C.) Of the students whose favorite subject is math, there is a lower frequency of 7th graders than 8th graders.
- D.) 7th grade students are most likely to prefer Science as their favorite subject.

7

The table below shows the number of rich and poor people in Arkansas and Kansas.

State	Rich	Poor
Arkansas	402	610
Kansas	375	427

What percentage (to the nearest percent) of people in Arkansas are rich?

8

The table below shows the number of rich and poor people in Arkansas and Kansas.

State	Rich	Poor
Arkansas	402	610
Kansas	375	427

Of the people surveyed, what is the relative frequency that are poor?

9

College students were surveyed if they were Math or Science majors and if they used an iPad for class. The results are shown below.

Major	Yes iPad	No iPad
Math	200	150
Science	320	100

What percentage of students use an iPad for their class work?

10

College students were surveyed if they were Math or Science majors and if they used an iPad for class. The results are shown below.

Major	Yes iPad	No iPad
Math	200	150
Science	320	100

What percentage of students who major in Math do not use an iPad?

11

A survey of students in a class explored the relationship between gender and if they watched this year's Super Bowl.

	Watched the Super Bowl	Did Not Watch the Super Bowl	Total
Boys	14	5	19
Girls	8	13	21
Total	22	18	40

If a girl is chosen from the set of girls at random, what is the probability that she watched the Super Bowl?

- A.) 40%
- B.) 20%
- C.) 38%
- D.) 8%

12

A survey of students in a class explored the relationship between gender and if they watched this year's Super Bowl.

	Watched the Super Bowl	Did Not Watch the Super Bowl	Total
Boys	14	5	19
Girls	8	13	21
Total	22	18	40

If a boy is chosen from the set of boys at random, what is the probability that he watched the Super Bowl?

- A.) 35%
- B.) 74%
- C.) 14%
- D.) 50%

13

A survey of students in a class explored the relationship between gender and if they watched this year's Super Bowl.

	Watched the Super Bowl	Did Not Watch the Super Bowl	Total
Boys	14	5	19
Girls	8	13	21
Total	22	18	40

Which is a reasonable conclusion to draw from this data?

- A.) There are more people in the class that did not watch the Super Bowl than those that did watch the Super Bowl.
- B.) Among the boys, there are more people who did not watch the Super Bowl than those who did watch the Super Bowl.
- C.) Among the girls, there are more people who watched the Super Bowl than those who did not watch the Super Bowl.
- D.) The probability that a boy chosen from the class watched the Super Bowl is greater than the probability that a girl chosen from the class watched the Super Bowl

14

A survey was conducted on whether a student had a curfew and if they had a cell phone. The results are shown below.

	No Curfew	Curfew	Total
No Cell Phone	5	15	20
Cell Phone	20	12	32
Total	25	27	52

What is the relative frequency of students who have cell phones and a curfew to the total number of students surveyed?

15

A survey was conducted on whether a student had a curfew and if they had a cell phone. The results are shown below.

	No Curfew	Curfew	Total
No Cell Phone	5	15	20
Cell Phone	20	12	32
Total	25	27	52

What is the relative frequency of students who do not have cell phones or a curfew to the total number of students surveyed?

16

A survey was conducted on whether a student had a curfew and if they had a cell phone. The results are shown below.

	No Curfew	Curfew	Total
No Cell Phone	5	15	20
Cell Phone	20	12	32
Total	25	27	52

Of the students who have cell phones, are they more likely to also have a curfew? (yes or no)

17

An 8th grade teacher surveyed her students to see who liked Chick-Fil-A and who liked Zaxby's. The results of the survey are in the table below.

	Chick-Fil-A	Zaxby's	Total
Boys	35	17	52
Girls	13	35	48
Total	48	52	100

What is the relative frequency of boys who liked Chick-Fil-A to girls who liked Chick-Fil-A?

18

An 8th grade teacher surveyed her students to see who liked Chick-Fil-A and who liked Zaxby's. The results of the survey are in the table below.

	Chick-Fil-A	Zaxby's	Total
Boys	35	17	52
Girls	13	35	48
Total	48	52	100

What is the relative frequency of girls who liked Zaxby's and the total number of girls?

19

An 8th grade teacher surveyed her students to see who liked Chick-Fil-A and who liked Zaxby's. The results of the survey are in the table below.

	Chick-Fil-A	Zaxby's	Total
Boys	35	17	52
Girls	13	35	48
Total	48	52	100

If a girl is chosen from the set of girls at random, what is the probability that she likes Chick-Fil-A?

- A.) 13%
- B.) 27%
- C.) 35%
- D.) 50%

20

An 8th grade teacher surveyed her students to see who liked Chick-Fil-A and who liked Zaxby's. The results of the survey are in the table below.

	Chick-Fil-A	Zaxby's	Total
Boys	35	17	52
Girls	13	35	48
Total	48	52	100

If a boy is chosen from the set of boys at random, what is the probability that he likes Zaxby's?

- A.) 17%
- B.) 35%
- C.) 33%
- D.) 100%
