

## 4.4 Volume of a prism

A box of chocolates is the shape of a **triangular prism**.

The triangular ends each have an area of  $140 \text{ cm}^2$ .

The box is 30 cm long.

The **volume of a prism** can be calculated using the rule:

**Volume = area of face  $\times$  height**  
 $V = A \times h$

EXAMPLE

$$\begin{aligned}\text{Volume} &= 140 \times 30 \\ &= 4\,200 \text{ cm}^3\end{aligned}$$

1 Use the rule  $V = A \times h$  to calculate the volume of each prism.

$$\begin{aligned}\text{Volume} &= \underline{\hspace{2cm}} \\ &= \underline{\hspace{2cm}}\end{aligned}$$

$$\begin{aligned}\text{Volume} &= \underline{\hspace{2cm}} \\ &= \underline{\hspace{2cm}}\end{aligned}$$

$$\begin{aligned}\text{Volume} &= \underline{\hspace{2cm}} \\ &= \underline{\hspace{2cm}}\end{aligned}$$

$$\begin{aligned}\text{Volume} &= \underline{\hspace{2cm}} \\ &= \underline{\hspace{2cm}}\end{aligned}$$

$$\begin{aligned}\text{Volume} &= \underline{\hspace{2cm}} \\ &= \underline{\hspace{2cm}}\end{aligned}$$

$$\begin{aligned}\text{Volume} &= \underline{\hspace{2cm}} \\ &= \underline{\hspace{2cm}}\end{aligned}$$

$$\begin{aligned}\text{Volume} &= \underline{\hspace{2cm}} \\ &= \underline{\hspace{2cm}}\end{aligned}$$

$$\begin{aligned}\text{Volume} &= \underline{\hspace{2cm}} \\ &= \underline{\hspace{2cm}}\end{aligned}$$

$$\begin{aligned}\text{Volume} &= \underline{\hspace{2cm}} \\ &= \underline{\hspace{2cm}}\end{aligned}$$

## 4.4 Volume of a prism

CONTINUED

$$\begin{aligned}\text{Volume} &= \underline{\hspace{2cm}} \\ &= \underline{\hspace{2cm}}\end{aligned}$$

$$\begin{aligned}\text{Volume} &= \underline{\hspace{2cm}} \\ &= \underline{\hspace{2cm}}\end{aligned}$$

$$\begin{aligned}\text{Volume} &= \underline{\hspace{2cm}} \\ &= \underline{\hspace{2cm}}\end{aligned}$$

2 For each prism, first calculate the area of the cross-section (the shaded face). Then calculate the volume of the prism.

$$\begin{aligned}\text{Area} &= \underline{\hspace{2cm}} \\ &= \underline{\hspace{2cm}} \\ \text{Volume} &= \underline{\hspace{2cm}} \\ &= \underline{\hspace{2cm}}\end{aligned}$$

$$\begin{aligned}\text{Area} &= \underline{\hspace{2cm}} \\ &= \underline{\hspace{2cm}} \\ \text{Volume} &= \underline{\hspace{2cm}} \\ &= \underline{\hspace{2cm}}\end{aligned}$$

$$\begin{aligned}\text{Area} &= \underline{\hspace{2cm}} \\ &= \underline{\hspace{2cm}} \\ \text{Volume} &= \underline{\hspace{2cm}} \\ &= \underline{\hspace{2cm}}\end{aligned}$$

$$\begin{aligned}\text{Area} &= \underline{\hspace{2cm}} \\ &= \underline{\hspace{2cm}} \\ \text{Volume} &= \underline{\hspace{2cm}} \\ &= \underline{\hspace{2cm}}\end{aligned}$$

$$\begin{aligned}\text{Area} &= \underline{\hspace{2cm}} \\ &= \underline{\hspace{2cm}} \\ \text{Volume} &= \underline{\hspace{2cm}} \\ &= \underline{\hspace{2cm}}\end{aligned}$$

$$\begin{aligned}\text{Area} &= \underline{\hspace{2cm}} \\ &= \underline{\hspace{2cm}} \\ \text{Volume} &= \underline{\hspace{2cm}} \\ &= \underline{\hspace{2cm}}\end{aligned}$$
