REVIEW

Write the formula for circumference inside the circle.

Rearrange the formula to see what to do when given the diameter instead of the radius.

Mark the radii and diameter.

$$C = 2\pi r$$
$$\text{SO } C = \pi d$$

CIRCUMFERENCE

Say it in your own words.

UNITS

Approximate by using

π

Means...

A =

UNITS

AREA AND CIRCUMFERENCE

-- PRACTICE --

Find the area and circumference of each circle.

A circle with a diameter of 16 cm

A circle with a radius of 4.8 inches
