

Congruence Statements

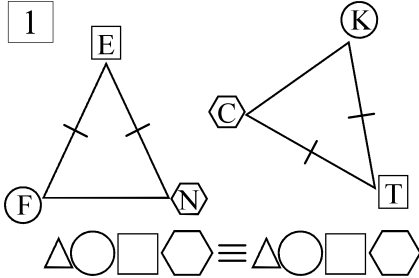

A congruence statement has the matching vertices named in the same order. Write a congruence statement for these.

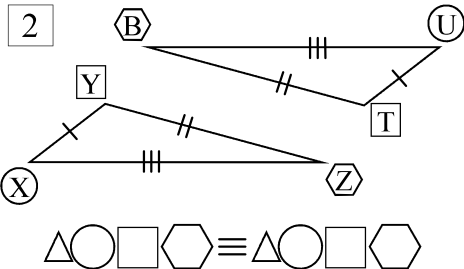

Example

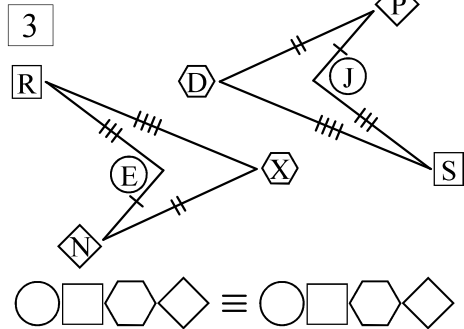

1

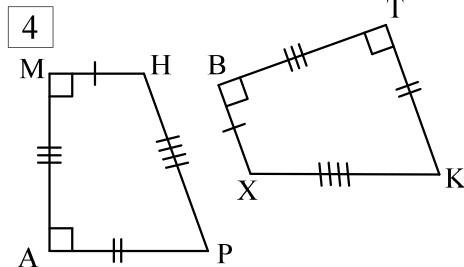

2

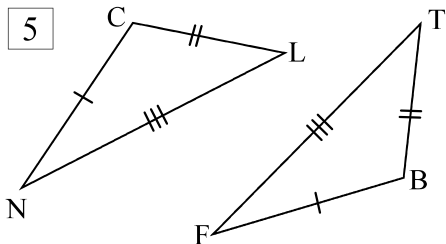

3

4

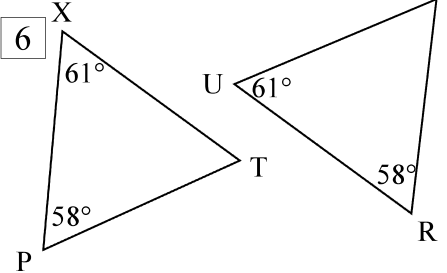

5

State which angles and sides are equal & complete congruence statements for these congruent shapes.

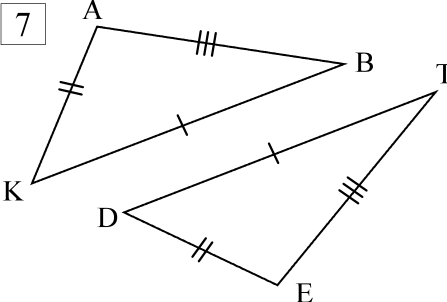

6

$\angle P = \angle R$ $\angle X = \angle U$
 $\angle T = \angle R$ $XP = UR$
 $PT = UR$ $XT = UR$
 $\triangle PXT \cong \triangle URE$

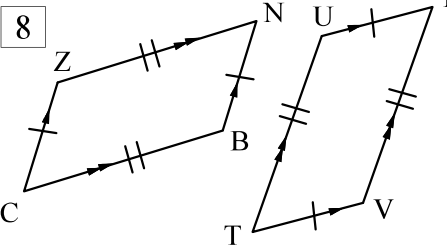

Remember same starting point & order.

7

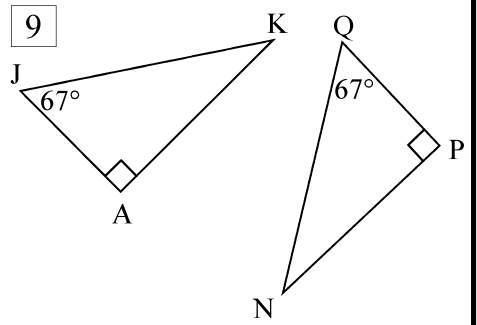

$\angle K = \angle T$ $\angle A = \angle B$
 $\angle D = \angle E$ $KA = TB$
 $AD = BE$ $KD = TE$
 $\triangle KAD \cong \triangle TBE$

8

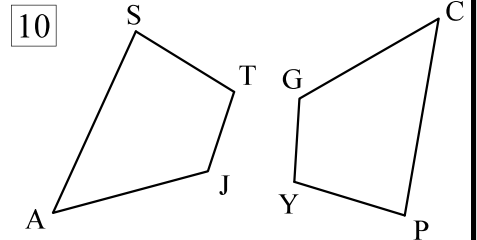

$\angle Z = \angle U$ $\angle N = \angle V$ $\angle B = \angle Y$
 $\angle Z = \angle U$ $\angle N = \angle V$ $\angle B = \angle Y$
 $ZN = UV$ $NB = VY$ $ZB = UY$
 $ZN = UV$ $NB = VY$ $ZB = UY$
 $\triangle ZNB \cong \triangle UVY$

9

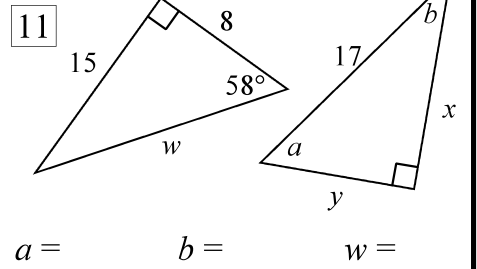

10

Find the value of all unknowns, for these congruent figures.

11

12
