

Venn Diagrams and Two-way tables

How do you use a two-way table or Venn diagram to calculate probabilities

What are Two way tables and Venn diagrams?

Two way tables list the number of outcomes or people in different categories.

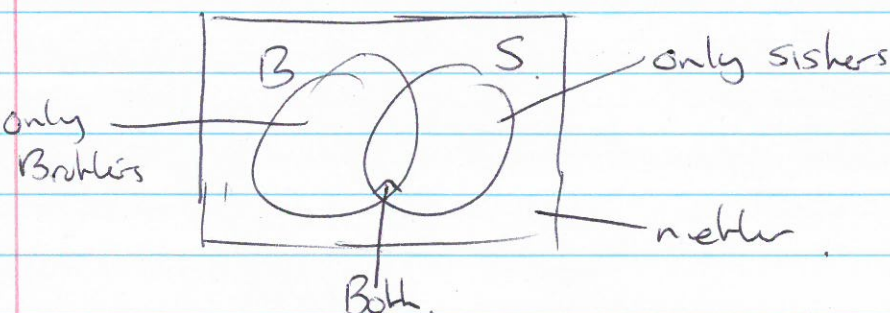

A Venn diagram is pictorial representation of a two way table with out totals.

Example Two-way table

		Brothers		
		Yes	No	Total
Sister	Yes			
	No			
Total				

Total number asked.

Example Venn diagram

Finding probabilities

$$Pr(B \text{ and } S) =$$

$$Pr(\text{only } B) =$$

$$Pr(B) =$$
