* overall loss of $\frac{1}{2}$ mark for total for not putting units in final answer.

1. [4 marks]

Estimate the approximate answer to each question then circle the alternative (A, B or C) that is closest to your approximation.

- a) 98.4×9.5 (100 x 10)
A) 100
B) 500
C) 1000

- c) The amount you earn for working 8 hours at \$11.45 per hour. $(8 \times 11) = 88$
A) \$20
B) \$70
C) \$90

- b) $382 + 401 + 589$ (400 + 400 + 600)
A) 1000
B) 1400
C) 1800

- d) The number of 95 mL drinks you can pour from a full 600 mL carton of milk. $600 \div 100$
A) 4
B) 6
C) 10

2. [4 marks]

Round each amount to the specified accuracy

Amount	Accuracy	Answer
a) 6.89	1 decimal place	6.9
b) 67.1	Nearest whole number	67
c) 180	Nearest 100	200
d) 67	Nearest 10	70

3. [2 mark]

Abigail is driving in her car 114km from her house to Yanchep. She travelled 21km in the morning and 30km in the afternoon. How far does she have to go?

$$114 - (21 + 30) = 114 - 51 = 63 \text{ km}$$

1. [2 marks]
Noah buys his lunch from the canteen. Each day he buys a choc milk for \$2.20 and a sausage roll for \$3.80. He goes to the canteen 5 days a week and orders the same thing everyday. How much does he spend in a week?

$$2.20 + 3.80 = 6.00$$

$$6.00 \times 5 = 30.00$$

\$30.00 spent at the canteen

2. [1 mark]
A high school has 984 students. School fees are \$23 per student. If all students pay the full fee how much will the school receive?

$$984 \times 23 = 22632$$

\$22632 in fees the school will receive

3. [8 marks]
a. Ella earns \$15.75 an hour. She would normally work 21 hours a week. How much does Ella earn each week?

$$15.75 \times 21 = 330.75$$

\$330.75 is the amount Ella would earn

- b. Ella receives time- and-a-half on weekends. If she worked 8 hours on the weekend, how much would she get paid for her weekend work?

$$8 \times 1.5 \times 15.75 = 189$$

\$189 for her weekend work

- c. After working the 8 hours on the weekend, calculate how much Ella would receive for her weekday work. Remember that she works a total of 21 hours a week.

$$21 - 8 = 13 \text{ hrs}$$

$$13 \times 15.75 = 204.75$$

$$204.75 + 189 = 393.75$$

Total earnings = \$393.75
