SODIUM	830 mg	260 mg	
POTASSIUM	290 mg	90 mg	

- How many kilojoules are in a serving?
- How much less than 1 g of sodium is included in a serving?
- Calculate the percentage of the fat in a serving that is saturated fat.
- The meal may contain small

amounts of 5 substances that might give very sensitive people an allergic reaction. List the 5 substances.

$$\text{Percentage saturated fat} = \frac{\text{grams of saturated fat}}{\text{total number of grams of fat}} \times 100$$

- 4 This information is provided on a bottle of BBQ sauce.

Servings per packet: 12		Serving size 30 mL
	Per serving	Per 100 mL
Energy	273 kJ	911 kJ
Protein	0.3 g	1.1 g
Fat	0.1 g	0.2 g
Carbohydrate – total	16.1 g	53.6 g
– Sugars	13.7 g	45.5 g
Cholesterol	nil	nil
Sodium	300 mg	1000 mg
Potassium	36 mg	118 mg

- How many servings are in the bottle?
 - How big is each serving?
 - How many mL does the bottle contain?
 - Calculate the total energy in the bottle.
 - How many grams of non-sugar carbohydrate are there in one serving?
 - In one serving, are there more grams of protein or sodium? Explain your answer.
 - According to the nutritional information, what percentage of the carbohydrate in the sauce is sugar?
 - Salt is sodium chloride, or just sodium. How much salt is in a bottle of sauce? Answer in grams.
 - The term *no cholesterol* can be confusing. *No cholesterol* does not mean the food is necessarily low in fat. How much fat is contained in a bottle of sauce?
- 5 Part of the nutritional information provided on a milk drink includes information about the recommended daily allowances of minerals and vitamins.

	Per serving	Percentage of recommended daily allowance
Iron	2.7 mg	20%
Calcium	110 mg	50%
Vitamin B1	0.18 mg	20%
Vitamin B2	0.14 mg	25%
Sodium	49 mg	10%
Potassium	120 mg	10%

Matthew explained how he calculated the recommended daily allowance of iron. He said 'I divided 2.7 by 20 to find out 1%, then I multiplied by 100 to get 100%.'

$$\begin{aligned}\text{Recommended daily allowance of iron} &= 2.7 \div 20 \times 100 \\ &= 13.5 \text{ mg}\end{aligned}$$

- Calculate the recommended daily allowance of calcium.
- What is the recommended daily allowance of vitamin B2? Answer in mg, correct to 1 decimal place.
- Calculate the recommended daily allowance of potassium and express your answer in grams.
