

Area of Squares

© FREEFALL MATHEMATICS - FREEFALL MATHEMATICS ALTITUDE BOOK 1 - LICENSED FOR NON-COMMERCIAL USE

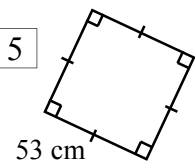

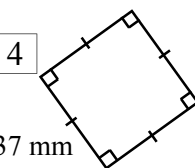

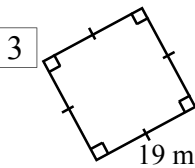

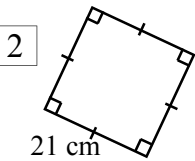

Find the areas of the squares below

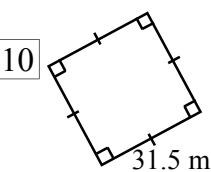

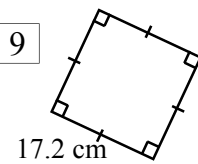

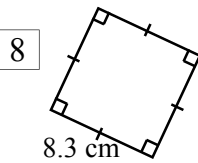

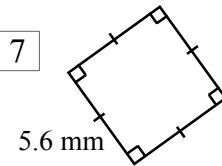

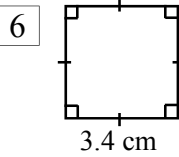

$$A = l^2$$

=

$$A = \text{m}^2$$

Find the area of these using decimals

Now instead of a diagram read the problems

11 A quilt is to be made of 17 cm side length square patches. Calculate the area of one of these patches.

12 A garden shed has a square roof with 2.3 m side lengths. Calculate the area of the roof in square metres.

13 A courtyard has a square grassed section with 27 m long sides. Find the area for this section.

14 If turf costs \$4/m² what would be the cost of relaying the grass surface above?

$$\text{Cost} = \text{area} \times \text{unit cost}$$
