

Area of Squares and Rectangles

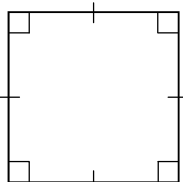

© FREEFALL MATHEMATICS - FREEFALL MATHEMATICS ALTITUDE BOOK 2 - LICENSED FOR NON-COMMERCIAL USE

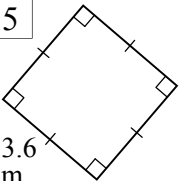

Use $A=l^2$ to find the area of these squares, to 1 d.p. Show a^2 as area is in square units.

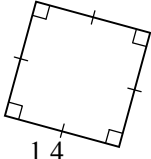

1  $A = l^2$
 $= \square^2$
 Calc: $9 \times 9 =$
 $A = \square \text{ cm}^2$

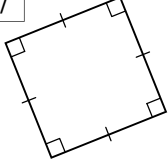

2  $A =$
 $A = \square \text{ cm}^2$

3  _____

4  _____

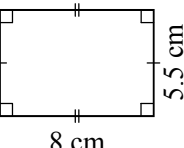

5  _____

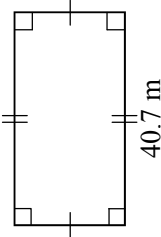

6  _____

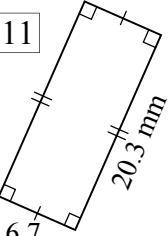

7  _____

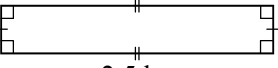

8  _____

Now rectangles. Use $A=lb$ to find the area, round to 1 d.p. when required.

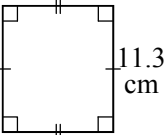

9  $A = lb$
 $= \square \times \square$
 $A =$

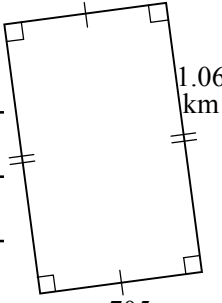

10  _____

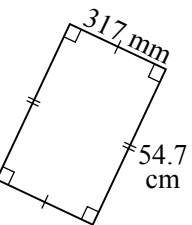

11  _____

12  _____

Answer in km^2

13 Answer in cm^2 .  _____

14 In m^2 .  _____

15 In mm^2 .  _____

Apply your area skills to these questions.

16 How much would it cost to tile a square room with sides of 3.5 m, if tiles cost $\$73.20/\text{m}^2$?
 Cost = _____
 Cost = _____

17 A rectangular field has sides 980 m and 660m. Find its area in ha given $1 \text{ ha} = 10\,000 \text{ m}^2$.

18 Office paper often weighs 80 grams per m^2 . Find the weight of an A4 sheet, which has sides 29.7 cm and 21 cm. Answer to the nearest gram.

19 A square has an area of 275.56 cm^2 . What is its side length?

20 A rectangle has an area of 630.8 mm^2 . Find its breadth in cm if it has a length of 16.6 mm.
