

Volume, Area and Height - Volume of a Prism

© FREEFALL MATHEMATICS - FREEFALL MATHEMATICS ALTITUDE BOOK 2 - LICENSED FOR NON-COMMERCIAL USE

Multiply the area by the height to find the volume

1

$$V = Ah$$

$$= \boxed{} \times \boxed{}$$

$$V = \boxed{} \text{ m}^3$$

Apply your volume skills to these questions. The bill for this job is too much to wear!

A council duck pond has to have the mud build-up removed. It has to be drained, excavated and refilled.

18 Find the mud volume in m³.

19 Find the water volume in m³.

20 Mud excavation/removal costs \$712 per m³ (or part m³). Find the cost for mud removal.

21 Find the volume of water in the mud cleared pond in m³.

22 Find the percentage increase for the volume of water. (1 d.p.)

$$\% \text{ Increase} = \frac{\text{H}_2\text{O Vol}_{\text{NEW}}}{\text{H}_2\text{O Vol}_{\text{OLD}}} \times 100 - 100$$

$$= \frac{\boxed{}}{\boxed{}} \times 100 - 100$$

$$\% \text{ Increase} = \underline{\hspace{2cm}}$$
