

Volume of Various Prisms

© FREEFALL MATHEMATICS - FREEFALL MATHEMATICS ALTITUDE BOOK 2 - LICENSED FOR NON-COMMERCIAL USE

These shapes will often require you to find the face area first, then use $V = Ah$ for the volume. Round to 2 d.p. when needed.

1 Cube

$$V = l^3$$

16 cm

2

$$V = lbh$$

25 cm

42 cm

58 cm

3 V in cm^3

$$A = \frac{1}{2}xy$$

4 Units are in mm.

$$A = \frac{1}{2}(a+b)h$$

6 V in cm^3 .

$$A = bh$$

7

$$A = \frac{1}{2}(a+b)h$$

8

V in cm^3 .

$$A = \frac{1}{2}xy$$

9

$$V = \frac{1}{2}lbh$$

5 Cube

22 mm

$$V = l^3$$

10

$$A = \frac{1}{2}(a+b)h$$

11 V in m^3 .

$$V = lbh$$

12 V in m^3 .

$$A = bh$$

13

$$A = \frac{1}{2}xy$$
