

Unit 2: Task 9 Part A - GEOGRAPHY Research Task

Due: Week 10, Term 3 2021

Name: _____

Type: Geographical Inquiry

(Total Weighting = 10%)

Part A: 66 Marks

Task 9: Geographical inquiry investigating **ONE** of the following elements of culture:

- fashion
- a sport or leisure activity
- religion
- language
- architecture
- political/social ideas

Part A 4%: Geographical Inquiry Skills (Research notes and inquiry information, including addressing inquiry questions) (***Includes Section 1 and Section 2 below***)

Part B 6%: Geographical Knowledge (Validation In-class – extended responses, based on chosen element of culture). (Timed/Test Conditions)

Maximum word limit: 3,000 * Excluding Bibliography

PART A:

1: Focus Topics/Questions

Students are to research their selected element of culture and take notes under the focus topics/questions provided.

2: Report

You will submit all planning (Section 1) plus communicate your findings using a report, which will be structured using notes format and will include headings and sub-headings. Look carefully at the marks allocation. This should provide you with a guide of the amount of detail provided per section.

RESEARCH & INQUIRY AREAS/QUESTIONS

Investigate – To plan, search or inquire into; examine in order to obtain the true facts. (Source: SCSSA – Glossary of key words in the formulation of questions)

Section of Report	Focus Topics/Questions:	✓
Section 1	Element of Culture – Origin and Dispersal – (8 marks)	
	Investigate and present information about the transfer or dispersal of the selected element of culture over time, from its place/region of origin to other places/regions in the world. Include maps and/or diagrams to support your information.	
Section 2	Element of Culture – Factors facilitating the diffusion – (12 marks)	
	Investigate and present information about how two (2) of the factors listed below have contributed to the diffusion of the selected element of culture. - <i>advancements in transport telecommunications</i> - <i>other emerging technologies</i> - <i>the role played by transnational institutions and/or corporations</i> - <i>the role played by media.</i>	
Section 3	Element of Culture – Case Studies – (8 marks)	
	Refer to two case studies, investigate and present information about the ways in which people and places have embraced, adapted to, or resisted, the integration of the selected element of culture.	
Section 4	Element of Culture – Implications of the changes in nature and spatial distribution – (10 marks)	
	Investigate and present information about the implications of the changes in the nature and spatial distribution of the element of culture for peoples and places at a range of scales, including the local.	
Section 5	Element of Culture – Likely future changes in the nature and spatial distribution – (6 marks)	
	Investigate and present information/predictions about the likely future changes in the nature and spatial distribution of the element of culture.	

**You must address all the areas/questions above
in your final report.**

**!! You must include geographical data, such as statistics and data
to support you research. This data can be gathered from both
primary and secondary sources !!**

Unit 2: Task 2 Part A – Geography Inquiry Research Task Element of Culture (Planning, Notes and Final Report)

Observing, questioning and planning					
* Devise and present a plan for a geographical inquiry based on the questions/focus topics					
Task ↓ & Marks Allocation →	1 – 2		3 - 4		Subtotal
Planning	Presents a generalised plan which includes some geographical inquiry questions, and some indication of methodology. Uses basic formats.		Presents a detailed and comprehensive plan which includes clearly defined aims, geographical inquiry questions, and appropriate methodology. Possible formats, such as action plan, structured overview, brainstorm, KWL chart.		
Collecting recording, evaluating and representing - NOTETAKING					
* Collect information from a range of primary and/or secondary sources					
Use appropriate methods to record your observations in a range of graphic representations using spatial and/or information and communication technologies					
Task ↓ & Marks Allocation →	1 - 2	3 - 4	5 - 6	7 - 8	Subtotal
Notetaking	Information collected from a limited range of sources may lack geographical context Records brief information and/or data with no use of spatial technologies and information and communication technologies.	Collects geographical information from a limited range of primary and/or secondary sources Records generalised information and/or data in a limited range of graphic representations using spatial technologies and information and communication technologies	Collects geographical information from a range of primary and/or secondary sources Records information and/or data in a range of graphic representations using spatial technologies and information and communication technologies, where appropriate	Collects geographical information from a range of primary sources (e.g. interviews, questionnaires, students' own experiences, and field observations) and/or secondary sources (e.g. online maps, websites, spatial software applications, print resources and visual media) Records detailed information and/or data in a range of graphic representations using spatial technologies and information and communication technologies, where appropriate	
BELOW REFERS TO THE INFORMATION TO BE INCLUDED IN YOUR REPORT					
Task ↓ & Marks Allocation →	1 - 2	3 - 4	5 - 6	7 - 8	Subtotal
Section 1 – Origin and Dispersal Overtime	Provides a limited information of the transfer or dispersal of the selected element of culture over time. Maps and/or diagrams may be used to enhance the information provided but lack accuracy. Reference to geographical terminology and concepts is limited or inaccurate.	Provides a generalised information of the transfer or dispersal of the selected element of culture over time, from its place/region of origin to other places/regions in the world. Maps and/or diagrams may be used to enhance the information and may lack accuracy. Attempts to apply some relevant geographical terminology and concepts.	Provides less detailed and mostly accurate information about the transfer or dispersal of the selected element of culture over time, from its place/region of origin to other places/regions in the world. Makes use of appropriate maps and/or diagrams to enhance the information provided and applies some relevant geographical terminology and concepts.	Provides very detailed, comprehensive and accurate information about the transfer or dispersal of the selected element of culture over time, from its place/region of origin to other places/regions in the world. Makes use of appropriate maps and/or diagrams to enhance the information provided and accurately applies relevant geographical terminology and concepts.	

Task ↓ & Marks Allocation →	1 - 2		3 - 4		5 - 6	Subtotal	
Section 2 – Factors contributing to the diffusion Factor #1	Demonstrates a limited understanding of the first selected factor. Attempts to provide limited and/or basic information about how the factor has contributed to the diffusion of the selected element of culture but information may be inaccurate. Supporting evidence and reference to geographical terminology and concepts is limited.		Demonstrates a general understanding of the first selected factor and some detail, however generalised information of how the factor has contributed to the diffusion of the selected element of culture. Provides some supporting evidence to enhance the information and attempts to apply some geographical terminology and concepts.		Demonstrates a clear understanding of the first selected factor and provides detailed, comprehensive and accurate information of how the factor has contributed to the diffusion of the selected element of culture. Correctly applies a wide range of appropriate supporting evidence (including quotations, sources, statistics, data, maps, diagrams and/or sketches) to enhance the information, and accurately applies relevant geographical terminology and concepts.		
Section 2 – Factors contributing to the diffusion Factor #2	Demonstrates a limited understanding of the first selected factor. Attempts to provide limited and/or basic information about how the factor has contributed to the diffusion of the selected element of culture but information may be inaccurate. Supporting evidence and reference to geographical terminology and concepts is limited.		Demonstrates a general understanding of the first selected factor and some detail, however generalised information of how the factor has contributed to the diffusion of the selected element of culture. Provides some supporting evidence to enhance the information and attempts to apply some geographical terminology and concepts.		Demonstrates a clear understanding of the first selected factor and provides detailed, comprehensive and accurate information of how the factor has contributed to the diffusion of the selected element of culture. Correctly applies a wide range of appropriate supporting evidence (including quotations, sources, statistics, data, maps, diagrams and/or sketches) to enhance the information, and accurately applies relevant geographical terminology and concepts.		
Task ↓ & Marks Allocation →	1 - 2		3 - 4		5 - 6	7 - 8	Subtotal
Section 3 - Case Studies	Provides limited or inaccurate information of how people and places have embraced, adapted to or resisted the integration of the selected element of culture. Provides basic and limited case studies. Supporting evidence and reference to geographical terminology and concepts is limited.		Provides generalised information of how people and places have embraced, adapted to or resisted the integration of the selected element of culture. Provides generalised information on one or two case studies. Makes some reference to evidence associated with a case study and attempts to apply some geographical terminology and concepts.		Provides less detailed and mostly accurate information of how people and places relevant to two case studies, have embraced, adapted to or resisted the integration of the selected element of culture. One case study may be in more depth than the other. Makes reference to appropriate supporting evidence and applies some relevant geographical terminology and concepts.	Provides a detailed, comprehensive and accurate information of how people and places relevant to two case studies, have embraced, adapted to or resisted the integration of the selected element of culture. Correctly applies a wide range of appropriate supporting evidence (including quotations, sources, statistics, data, maps, diagrams and/or sketches) and accurately applies relevant geographical terminology and concepts.	

Task ↓ & Marks Allocation →	1 - 2	3 - 4	5 - 6	7 - 8	9 - 10	Subtotal
Section 4 - Implications of the changes in nature and spatial distribution	Provides a little to no relevant information of the implications, such as the advantages and disadvantages associated with the changes in the nature or spatial distribution of the selected element of culture. Examples of peoples and places that have been affected are inaccurate or not included. Little to no supporting evidence is applied to support the information provided.	Provides limited and basic information of implications, such as the advantages and disadvantages associated with the changes in the nature or spatial distribution of the selected element of culture. Uses some examples of peoples and places that have been affected. Limited supporting evidence is applied to support the information provided.	Provides generalised information of some implications, such as the advantages and disadvantages associated with the changes in the nature and spatial distribution of the selected element of culture. Uses some examples of peoples and places that have been affected. Applies some supporting evidence and geographical terminology and concepts to support the information provided.	Provides less detailed and accurate information of some of the implications, such as the advantages and disadvantages associated with the changes in the nature and spatial distribution of the selected element of culture. Uses specific examples of peoples and places that have been affected at a range of scales, including the local. Applies some supporting evidence and geographical terminology and concepts to support the information provided.	Provides very detailed, comprehensive and accurate information of the implications, such as the advantages and disadvantages associated with the changes in the nature and spatial distribution of the selected element of culture. Uses specific examples of peoples and places that have been affected at a range of scales, including the local. Applies a wide range of appropriate supporting evidence (including quotations, sources, statistics, data, maps, diagrams and/or sketches) and relevant geographical terminology and concepts to enhance the information provided.	
Task ↓ & Marks Allocation →	1 - 2	3 - 4	5 - 6			Subtotal
Section 5 - Likely future changes in the nature and spatial distribution	Makes a limited and basic attempt to predict and present information about the likely future changes in the nature or spatial distribution of the selected element of culture, however, no evidence is provided to support the suggestion. Maps and/or diagrams are omitted from the response.	Makes some attempt to predict and present information the likely future changes in the nature and/or spatial distribution of the selected element of culture, however, the suggestion is based on limited evidence. A map and/or diagram may be used to support the suggested trend.	Presents generalised information and predictions about the future diffusion, adoption and/or adaptation of the selected element of culture, based on available evidence. Provides maps and/or diagrams to support the suggested trend.			

Bibliography

Acknowledge sources of information and use an approved referencing technique – submit a well referenced bibliography.

Task ↓ & Marks Allocation →	1 - 2	3 - 4	5 - 6	Subtotal
Bibliography	Bibliography includes a limited list of sources which may follow the referencing technique approved by the school	Bibliography includes a smaller range of sources which mostly follow the referencing technique approved by the school	Bibliography includes a comprehensive list of primary sources (e.g. interviews, questionnaires, students' own experiences, and field observations) and/or secondary sources (e.g. online maps, websites, spatial software applications, print resources and visual media) which correctly follow the referencing technique approved by the school	

Communicating

Communicate your findings as a report (includes headings and sub-headings) using notes format (such as outlining and expanded dot points). *E.g. read the key directional words to determine the detail for each section and carefully read the marks allocation and marking guides. Remember to use appropriate written, cartographic and graphic forms*

Task ↓ & Marks Allocation →	1 - 3	4 - 5	6 - 7	8 - 10	Subtotal
Report	Findings (Report in the notes format, using outlining as a key focus) includes limited supporting evidence, such as examples, data and statistics. Rarely or inaccurately uses geographical terminology and concepts. Does not address the key research areas (focus topics/questions) from Geographical Knowledge and Understanding or addresses topics in basic or limited detail. Makes limited use of evidence to support statements and generalisations.	Findings (Report in the notes format, using outlining as a key focus) includes some appropriate supporting evidence to develop and enhance explanations and information. Uses limited headings and sub-headings to structure notes and uses limited key research areas from Geographical Knowledge and Understanding. Makes limited reference to supporting evidence, such as examples, data and statistics. Applies some geographical terminology and concepts to develop explanations and information. Selects and applies some supporting evidence, including examples, quotations, sources, statistics, maps and/or sketches, when developing responses.	Findings (Report in the notes format, using outlining as a key focus) includes a range of accurate supporting evidence to develop and enhance explanations and information. Refers briefly to supporting evidence with some references throughout. Uses some appropriate headings and sub-headings to structure findings and addresses most key research areas from Geographical Knowledge and Understanding. Applies relevant geographical terminology and concepts to develop explanations and information. Selects and applies a range of appropriate supporting evidence, including examples, quotations, sources, statistics, data, maps and/or sketches, when developing findings.	Findings (Report in the notes format, using outlining as the key focus) includes a comprehensive range of accurate supporting evidence (including quotations, sources, statistics, data, maps, sketches and/or diagrams) to develop and enhance explanations and information, including reference to supporting evidence, such as data, statistics and examples. Uses appropriate headings and sub-headings to structure notes and uses all key research areas from Geographical Knowledge and Understanding. Applies relevant geographical terminology and concepts to develop concise explanations and information. Selects and correctly applies a wide range of appropriate supporting evidence, including examples, quotations, sources, statistics, data, maps and/or sketches, when developing findings.
