

YEAR 11 INVESTIGATION MARKING RUBRIC

TASK		MARK /1	TOTAL MARKS
1	ABSTRACT		
	Abstract clearly articulates the findings of the experiment		/1
2	INTRODUCTION		
	Introduction clearly articulates the purpose of the investigation		
	Introduction describes the properties being investigated and highlights the dependent and independent variables		/2
3	METHOD		
	Method is described in steps		
	Method is written in third-person passive		
	Method clearly changes the independent variable		
	Method clearly changes the dependent variable		/4
4	RESULTS		
	Table of results has appropriate title including variables		
	Table labelled appropriately (independent variable in first column)		
	Table has informative headings for the columns		
	Table includes the units in the headings only		
	Graph has appropriate heading		
	Graph has independent variable on X-axis and dependent variable on Y-axis		
	Graph has both axis labelled		
	Scale of graph is appropriate to the data represented		/8

5	DISCUSSION		
	Discussion questions addressed and present correct and accurate information (6 questions i.e. 6 marks)		/10
	Sources of potential error have been identified		
	The accuracy of the data was discussed by considering the potential sources of error		
	The validity of the investigation was discussed by considering adequate control of variable and sources of error		
	The reliability of the data was discussed by considering the range of results and any anomalies		
6	CONCLUSION		
	The conclusion summarises the experimental findings		/2
	The conclusion clearly articulates the link between the results and the purpose of the experiment identified in the introduction		
7	REFERENCES		
	Reference list is clearly displayed and contains appropriate references structured in a style of the students' choice from the following allowed formats: Chicago , APA , IEEE		/1
