

FDR's MAJOR ALPHABET AGENCIES DURING THE FIRST NEW DEAL

Date Instituted	Agency/Programme Title	Purpose/Aims/Objectives	Successes/Outcomes	Status
31/3/1933	CCC - Civilian Conservation Corps	To employ young men aged 18-25 years in forest, soil and water conservation projects	Employed around 2.5 million men on short-term basis. Fed and clothed these, sent wages to their families. Provided education and training - but more importantly gave hope and self respect	Ended in 1941
12/5/1933	AAA - Agricultural Adjustment Administration	Farmers paid subsidies to restrict production. Food processors taxed to pay costs.	This agency helped larger producers (often at the expense of small farmers and share-croppers). Although prices stabilised almost at pre WWI levels	Ended by 1938
12/5/1933	FERA - Federal Emergency Relief Administration	Channelled \$500 million to charities and relief agencies to clothe, feed and house people. Funds matched \$ for \$ by States/agencies	This 'dole' measure provided immediate relief and assistance to an estimated 10 million needy between 1933 and 1936	Ended in 1936
18/5/1933	TVA - Tennessee Valley Authority	To construct dams, generate hydro-electric power, control floods and conserve denuded areas, other projects such as fertilizer manufacture and recreational projects were included	This was one of the most controversial agencies (owing to its involvement in areas usually catered for by private enterprise) and one of the most successful	Still operating
13/6/1933	HOLC - Home Owners Loan Corporation	To assist homeowners refinance mortgages where mortgage holders were in danger of defaulting owing to unemployment etc.	This measure helped many middle Americans in towns and cities avoid mortgage foreclosure and hence lessened homelessness	Ended in 1950
13/6/1933	NRA - National Recovery Administration	Designed to impose regulatory codes and standards on large and small businesses in terms of wages paid, hours worked, profits taken and general business ethics	Another highly controversial agency which created 557 basic and 208 supplementary codes. Around 2 million jobs were created through this scheme. Although many larger firms (Ford, General Motors) ignored the codes, it strengthened the labour movement in the USA	Ended in 1935
13/6/1933	PWA - Public Works Administration	To provide employment for workmen with construction skills and to provide public infrastructure buildings	Around 500 000 tradesmen employed in the construction of 13,000 schools, 600 local council offices, 80,000 km of roads and highways, dams, hospitals, sewage systems and housing projects. Main criticism was that funds were spent too slowly	Ended in 1937
