

Solving Problems With Tree Diagrams (Listing Possible Outcomes)

Name _____

You just won a free sundae from a contest you entered. You get to choose one of three flavors (Vanilla, Chocolate, or Strawberry). You also get to choose whether you would like whipped cream or Hot Fudge. Then, you get to choose one topping from this list: sprinkles or candies).

What are the possible outcomes? How many possible outcomes are there?
Fill in the blanks to complete the tree diagram.

3 possibilities $\times$ 2 possibilities $\times$ 2 possibilities = ? _____ Total possibilities

Solving Problems With Tree Diagrams Continued... (Listing Possible Outcomes)

You just found a coupon for a free pizza! They have restrictions on what you can order, though. Using the terms below, draw a tree diagram listing all the possible outcomes. Then, answer the questions that follow. Probability should be written as a fraction.

Crusts (Choose One): Thin, Pan, Hand-Tossed, or Deep Dish
Toppings (Choose One): Pepperoni, Peppers, or Onions

Type of Crust

Toppings

Possible Outcomes

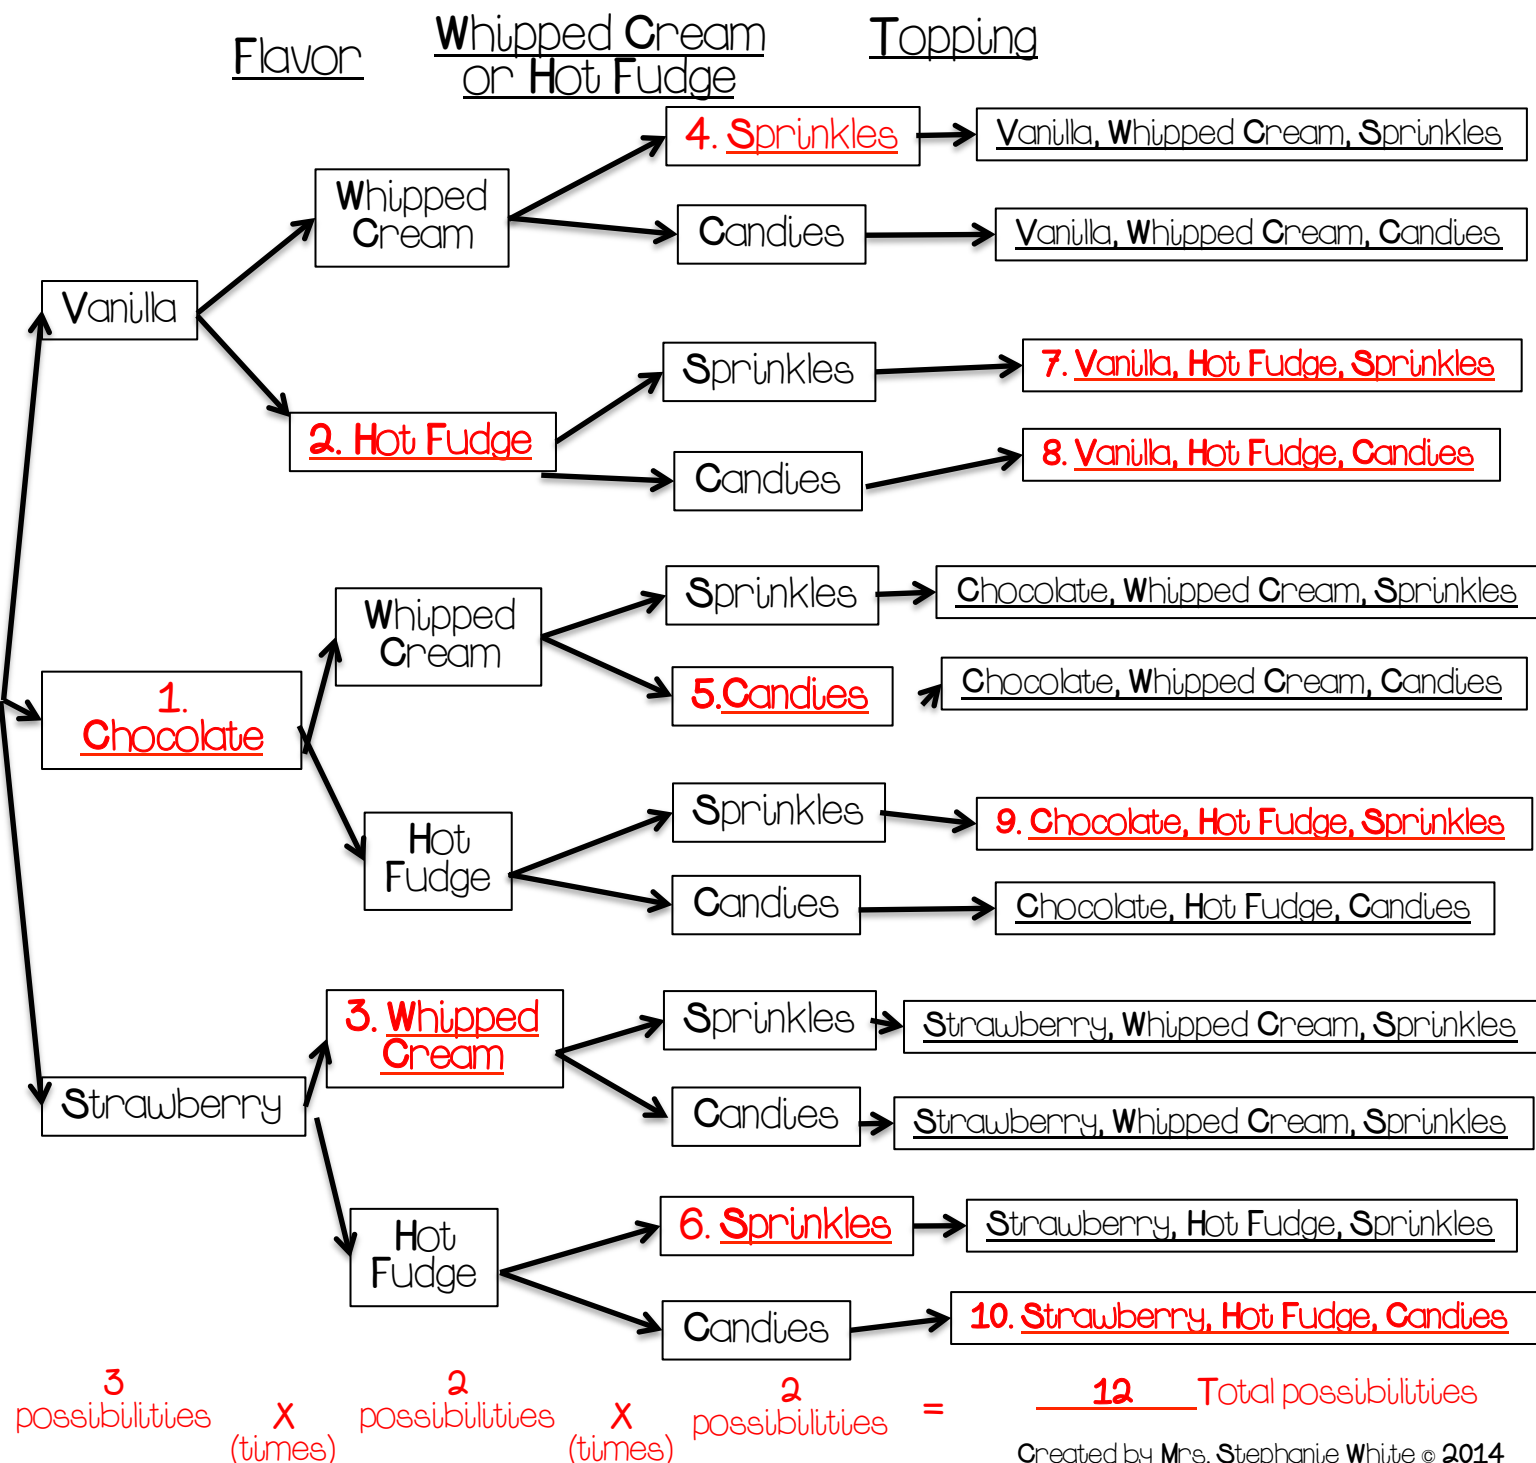

1. How many possible outcomes are there if you can choose only one type of crust and one topping? _____
2. If a pizza was chosen for you randomly, what is the probability you will get a Hand-tossed pizza with pepperoni for the topping? _____
3. If a pizza was chosen for you randomly, what is the probability you will get pepperoni as a topping? _____
