

Compound Interest

Puzzle

Name: _____ Date: _____ Period: _____

Compound Interest

Puzzle

$$A = P \left(1 + \frac{r}{n} \right)^{nt}$$

The diagram shows the formula $A = P \left(1 + \frac{r}{n} \right)^{nt}$ with arrows pointing to the following parts: A (Total Amount), P (Principal), r (Annual Interest Rate), n (Number of times interest is compounded per year), t (Time in years), and the entire expression in parentheses $\left(1 + \frac{r}{n} \right)$.

Calculate the total amount of the investment or total paid in the loan.

1	2	3
4	5	6
7	8	9

10	11	12
13	14	15
16	17	18
19	20	21

Name: _____ Date: _____ Period: _____

Compound Interest

Puzzle

Amount $\rightarrow$ $A = P \left(1 + \frac{r}{n} \right)^{nt}$ $\leftarrow$ rate of interest

Principal $\rightarrow$ P $\leftarrow$ time in years

n $\leftarrow$ Number of times per year, interest is compounded

Calculate the total amount of the investment or total paid in the loan.

Name: Answer Key! Date: _____ Period: _____

Compound Interest

Puzzle

$$A = P \left(1 + \frac{r}{n} \right)^{nt}$$

Amount → A

Principal → P

rate of interest → r

time in years → t

Number of times per year, interest is compounded → n

Calculate the total amount of the investment or total paid in the loan.

1 \$7,092.00	2 \$1,574.64	3 \$495.23
4 \$6,615.00	5 \$16,281.33	6 \$12,079.50
7 \$2,031.73	8 \$7,981.58	9 \$3,400.99

10 \$33,347.72	11 \$61,448.96	12 \$16,214.06
13 \$653.69	14 \$29,160.00	15 \$78,955.31
16 \$341,194.86	17 \$1,768.56	18 \$7,735.79
19 \$23,010.08	20 \$40,146.77	21 \$39,295.11

Directions:

Print pages 1 & 2 for each set of students (I usually have my students work in partners). Every student will also need a copy of the recording sheet (pages 3 & 4 OR 5 & 6). You may choose to just have students work out all of the problems on a sheet of white lined paper. I use the recording sheet to help with organization, accountability, and for easy grading.

Students will solve all of the problems, cut out the pieces, and arrange them to create the figure below. The pieces fit together so that the problem and it's solution face one another along an edge.
