

# SLOPE PENNNANT

a collaborative  
slope activity

# DIRECTIONS

**Pages 3-7:** Pennants with QR codes

**Pages 9-13:** Pennants without QR codes

**Page 14:** Student answer sheet (in case you would like students to hand in their answers for individual credit)

**Page 15:** Title pennant and answer key

## Nuts and Bolts:

- ↳ Print pages 2-6 (and page 7 if you'd like).
  - ↳ Give a set of pages to each of your student groups.
  - ↳ Also give them scissors and a stapler, tape or a glue stick.
- OPTIONAL: colored pencils or markers.

## The Activity:

- Students complete the problems on each pennant.
- You can check their work quickly with the QR codes (I use a free QR code scanner from iHandy) or the traditional answer key (included).
- When a pennant is complete and correct, the student can add it to your string of completed pennants.
- Students can also color their pennants first 😊

←cut around the outermost edge of each pennant→

(fold along this edge and staple)

Find the slope  
of the line  
that passes  
through  
 $(-3, 4), (-7, 10)$ .

$m =$

1

(fold along this edge and staple)

→cut around the outermost edge of each pennant←

| $x$ | $y$ |
|-----|-----|
| 8   | -55 |
| 6   | -41 |
| 4   | -27 |
| 2   | -13 |

Can you find  
the slope shown  
in the table?

$m =$

2

←cut around the outermost edge of each pennant→

(fold along this edge and staple)

Can you find  
the slope of  
the line?

$m =$

How about the  
equation?

$y =$

3

(fold along this edge and staple)

→cut around the outermost edge of each pennant←

What is the  
slope of this  
equation?  
 $4x - 8y = 16$

$m =$

Can you write the  
equation in slope-  
intercept form?

$y =$

4

←cut around the outermost edge of each pennant→

(fold along this edge and staple)

Find the slope  
of the line  
that passes  
through  
(0, 17), (-7, 3).

$m =$

5

(fold along this edge and staple)

→cut around the outermost edge of each pennant←

|     |    |     |   |     |
|-----|----|-----|---|-----|
| $x$ | 0  | 2   | 4 | 6   |
| $y$ | 11 | 9.5 | 8 | 6.5 |

Can you find  
the slope shown  
in the table?

$m =$

9

←cut around the outermost edge of each pennant→

(fold along this edge and staple)

Can you find  
the slope of  
the line?

$m =$

How about the  
equation?

$y =$

7

(fold along this edge and staple)

→cut around the outermost edge of each pennant←

What is the  
slope of this  
equation?  
 $2x + 3y = 5x + 6$

$m =$

Can you write the  
equation in slope-  
intercept form?

$y =$

8

←cut around the outermost edge of each pennant→

(fold along this edge and staple)

Find the slope  
of the line  
that passes  
through  
(7, 2), (-3, 2).

m =

(fold along this edge and staple)

→cut around the outermost edge of each pennant←

|    |   |
|----|---|
| x  | y |
| -6 | 1 |
| -3 | 2 |
| 0  | 3 |
| 3  | 4 |

Can you find the slope  
shown in the table?

m =

How about the  
y-intercept?

b =

10

←cut around the outermost edge of each pennant→

(fold along this edge and staple)

Can you find  
the slope of  
the line?

m =

How about the  
equation?

y =

11

(fold along this edge and staple)

→cut around the outermost edge of each pennant←

What is the  
slope of this  
equation?  
 $-x - 2y = 8$

m =

Can you write the  
equation in slope-  
intercept form?

b =

12

←cut around the outermost edge of each pennant→

(fold along this edge and staple)

Find the slope  
of the line  
that passes  
through  
 $(-3, 3), (0, -12)$ .

$m =$

13

(fold along this edge and staple)

→cut around the outermost edge of each pennant←

|     |     |
|-----|-----|
| $y$ | $x$ |
| -12 | -4  |
| -9  | -3  |
| -6  | -2  |
| -3  | -1  |

Can you find  
the slope shown  
in the table?

$m =$

14

←cut around the outermost edge of each pennant→

(fold along this edge and staple)

Can you find  
the slope of  
the line?

$m =$

How about the  
equation?

$y =$

15

(fold along this edge and staple)

→cut around the outermost edge of each pennant←

What is the  
slope of this  
equation?  
 $3x + y = -9$

$m =$

Can you write the  
equation in slope-  
intercept form?

$y =$

16

←cut around the outermost edge of each pennant→

(fold along this edge and staple)

Find the slope  
of the line  
that passes  
through  
(8, 5), (-7, 20).

m =

17

(fold along this edge and staple)

→cut around the outermost edge of each pennant←

Can you find  
the slope shown  
in the table?

|   |     |
|---|-----|
| 7 | -33 |
| 5 | -23 |
| 3 | -13 |
| 1 | -3  |
| x | y   |

m =

81

←cut around the outermost edge of each pennant→

(fold along this edge and staple)

Can you find  
the slope of  
the line?

m =

How about the  
equation?

y =

19

(fold along this edge and staple)

→cut around the outermost edge of each pennant←

What is the  
slope of this  
equation?  
 $2x - 3y = 18$

m =

Can you write the  
equation in slope-  
intercept form?

y =

02

*No QR codes on pages 9-13*

←cut around the outermost edge of each pennant→
