

SYSTEMS OF EQUATIONS BY GRAPHING PARTNERS ACTIVITY

WRITE THE SYSTEM OF EQUATIONS FROM
THE GRAPH. WHAT IS THE SOLUTION?

FIND THE SOLUTION TO THE
SYSTEM OF EQUATIONS.

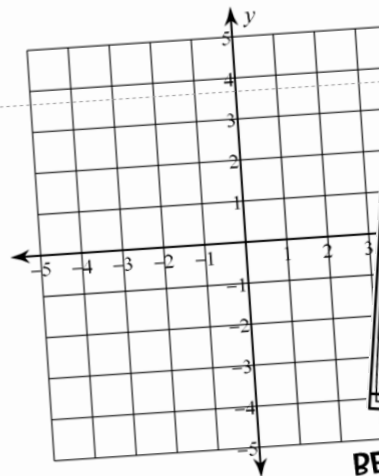

$$y = 7x + 4$$
$$y = -x - 4$$

JELLY

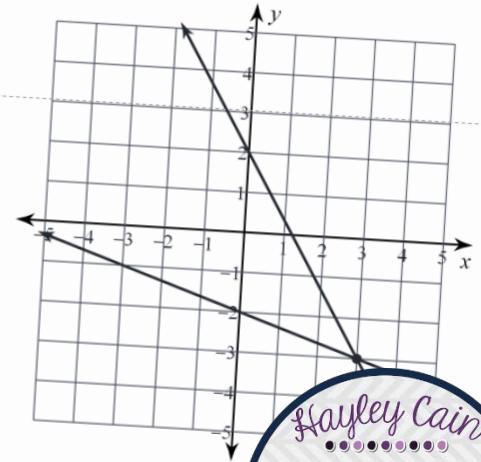

FIND THE SOLUTION TO THE
SYSTEM OF EQUATIONS.

$$y = -\frac{1}{3}x - 2$$
$$y = -\frac{5}{3}x + 2$$

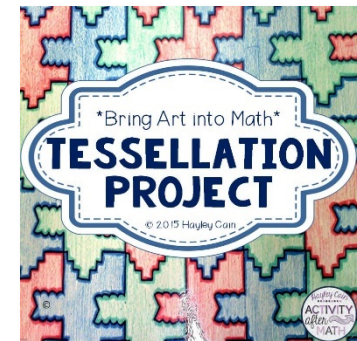

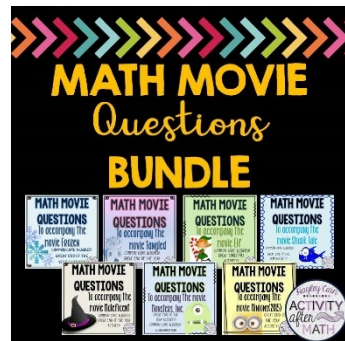

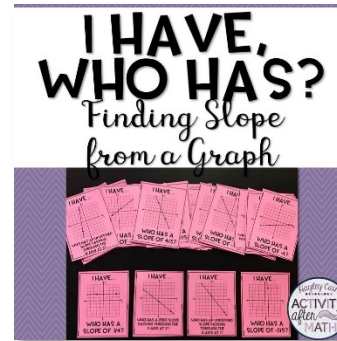

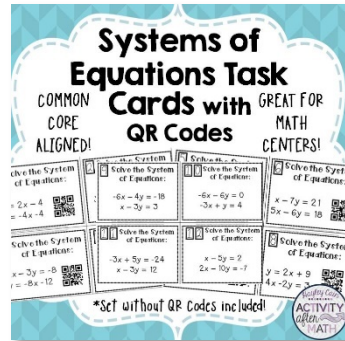

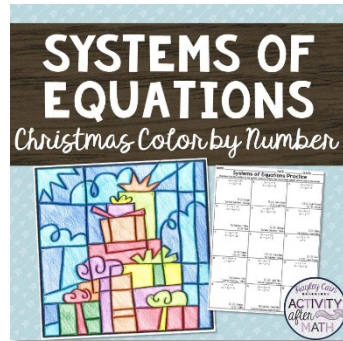

BEAST

ABOUT THIS PRODUCT:

-Included in your download:

- 20 matches (40 total cards)
- Teacher instructions
- Student instructions

*The answer key is the other match 😊

Students will follow directions on their card either finding the solution to a system of equations from a given graph or by graphing a system from given equations.

*Types of solutions include one solution, no solution and infinite solutions. There is a word at the bottom of each card that has a match. Example: Chips and Queso, cake and Ice cream

Students will find their match and check to see if they got the same answer!

I hope you and your students enjoy!
Happy teaching!

Teacher Instructions:

There are enough pairs for a class size of 40(20 matches). Take as many matches as your number of students.

Pass out randomly to your class. Be sure to not give a pair that sits next to each other! I usually give about 5-10 minutes for students to complete their card. I have students plug in the point of intersection into both equations on the back of the card and showing all of their work.

You can print these on colored paper and laminate for future use. Have students write on the card with an expo marker!

Have students find their match based on the word at the bottom of their card.

Ex: Chips and Queso

Compare answers! This is a great way for students to discuss their reasoning and for peer tutoring if it is needed.

I hope you and your students enjoy! Thank you!

Student Instructions:

Follow the instructions on your card.

You will either:

- find the system of equations and the solution based on the given graph
- find the solution of the system based on the given equations.

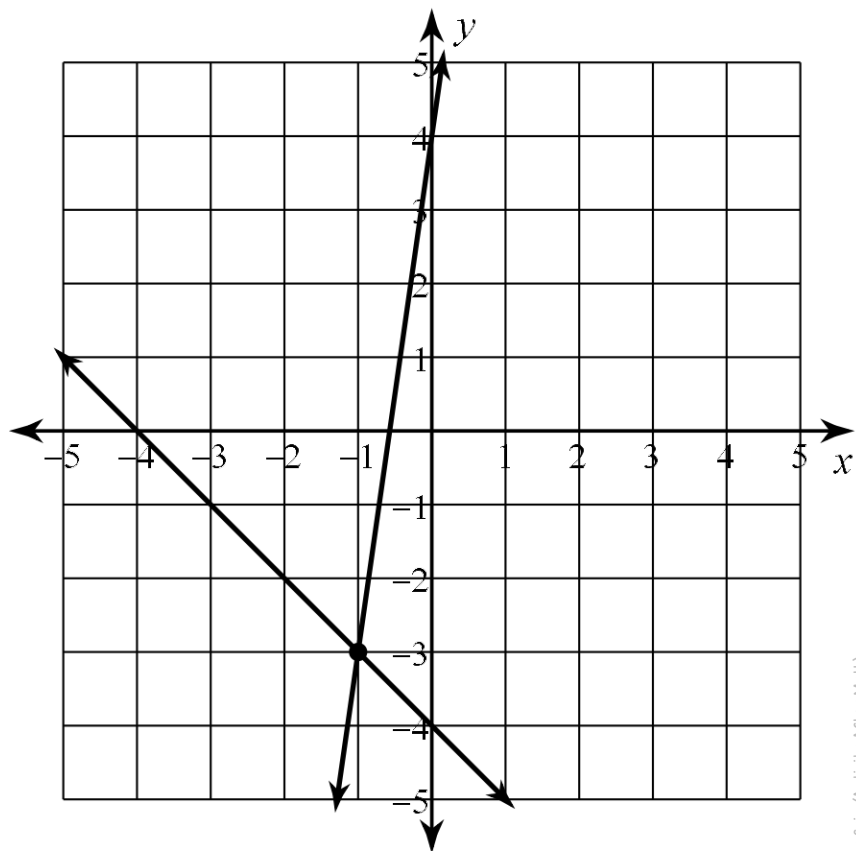

Check that the solution(if any) satisfies both equations on the back of your card! You must show all of your work!

When instructed, find your partner based on your word at the bottom.

*Example: biscuits and gravy

Check that your system(equations), solution(if any) and work are the same. If you do not have the same answers, then find the error and correct it if you need to!

WRITE THE SYSTEM OF EQUATIONS FROM THE GRAPH. WHAT IS THE SOLUTION?

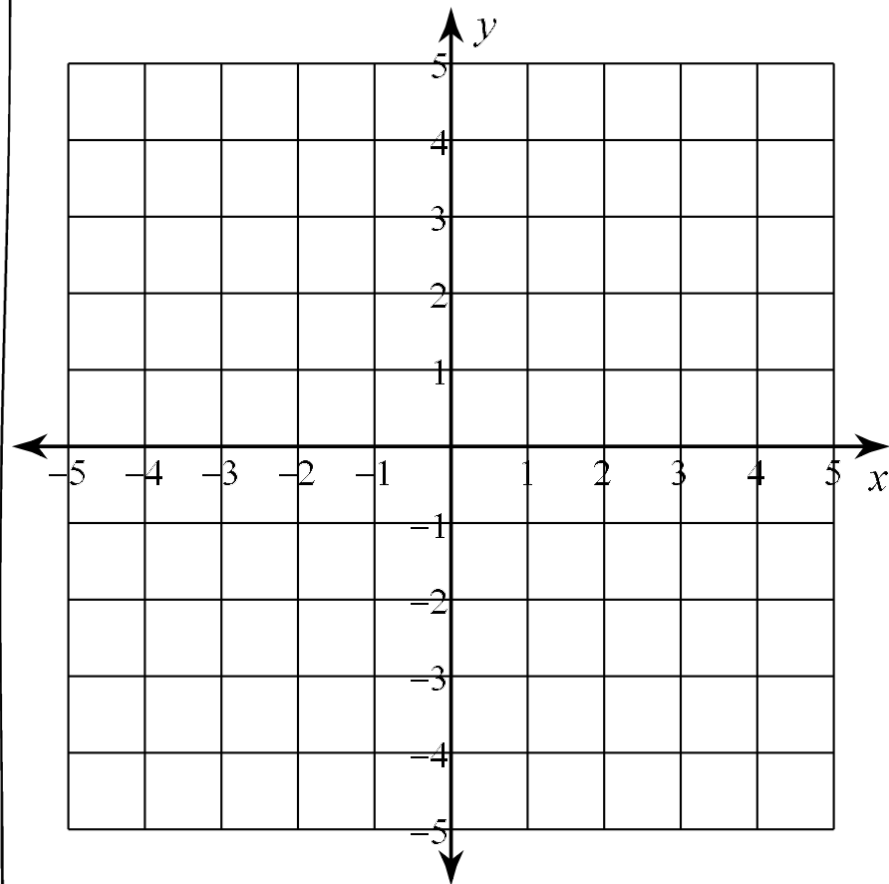

PEANUT BUTTER
