

Puzzling inequations 1

What to do

Complete the following puzzle to discover what can be tricky when solving inequations. Solve the equations on the left-hand side of the grid, connecting the dot next to the equation to the dot next to its answer. Each straight line drawn will pass through a letter and number, giving the puzzle's code. Place the letters in the answer grid provided.

$2a + 4 \leq 8$	•		•	$a \geq -4$
$7 - a \geq 14$	•	④	•	$a \leq 16$
$10 + 2a < 16$	•		•	$a < 10$
$4(a - 2) > 28$	•		•	$a \geq 1$
$\frac{a}{4} - 6 \leq -2$	•		•	$a \geq 2$
$\frac{2+a}{3} > 5$	•	②	•	$a < -1$
$24a - 10 \geq 38$	•		•	$a > 9$
$20 - 2a \leq 10$	•		•	$a \geq 5$
$5(a - 1) < 45$	•		•	$a \leq -12$
$10 - \frac{2a}{3} > 14$	•		•	$a > 13$
$-2(3 + 4a) \leq -14$	•		•	$a \leq -7$
$\frac{4-a}{5} < 2$	•		•	$a < -6$
$14 + 2a \leq -10$	•		•	$a \leq 2$
$-4(1 - 2a) \geq -36$	•		•	$a > -6$
$\frac{3-2a}{5} > 1$	•		•	$a < 3$

Answer

1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
