

Box and Whisker Plot

Interactive Notebook Pages & Activities

Steps to Make Box and Whisker Plots

Step 1:
Find the lower, middle and upper quartile of the data

Step 2:
On a number line, mark the lower quartile, the median and the least value. Also, mark the upper quartile.

Step 3:
Step 3: Draw a box from the lower quartile to the upper quartile.

Step 4:
Mark the median value on the vertical segment.

Step 5:
Draw whiskers from the box to the least and greatest values.

BOX AND WHISKER PLOTS

A box-and-whisker plot shows the distribution of data along a number line.

In a box-and-whisker plot, you use the median to divide data into two equal parts.

The two parts are related to medians, which divide the data into two equal parts.

The lower quartile is the median of the lower half of the data.

The upper quartile is the median of the upper half of the data.

Example: Find the lower, middle and upper quartile of the data set below:
4, 5, 6, 6, 7, 8, 9, 10

9. Find the lower, middle and upper quartile of the data set below:
3, 4, 4, 5, 6, 8, 8

Common Core Standard: 6.SP.4

- *Box and Whisker Plot Practice Problems (2 per page)
- *Box and Whisker Plot Directions (2 per page)
- *Box and Whisker Plot Vocabulary Practice (2 per page)
- *Box-and-Whisker Plot Double Dice Practice Mini Book (give each student 2 dice if you don't have double dice)
- *Answer Keys

BOX AND WHISKER PLOTS

1. A box-and-whisker plot shows the _____ of data long a number line.

2. To make a box-and-whisker plot, you use values called _____.

3. Quartiles divide data into _____ equal parts.

4. They are related to medians, which divide data into _____ equal parts.

5. The _____ quartile is the median of ALL the data.

6. The _____ quartile is the median of the lower half of the data.

7. The _____ quartile is the median of the upper half of the data.

8. Find the lower, middle and upper quartile of the data set below:

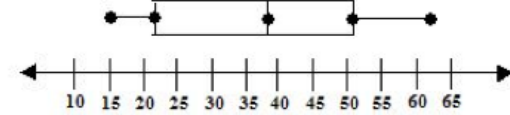

1, 1, 3, 4, 5, 6, 6, 7, 8, 9, 10

9. Find the lower, middle and upper quartile of the data set below:

3, 4, 4, 5, 6, 8, 8

BOX AND WHISKER PLOTS

1. A box-and-whisker plot shows the _____ of data long a number line.

2. To make a box-and-whisker plot, you use values called _____.

3. Quartiles divide data into _____ equal parts.

4. They are related to medians, which divide data into _____ equal parts.

5. The _____ quartile is the median of ALL the data.

6. The _____ quartile is the median of the lower half of the data.

7. The _____ quartile is the median of the upper half of the data.

8. Find the lower, middle and upper quartile of the data set below:

1, 1, 3, 4, 5, 6, 6, 7, 8, 9, 10

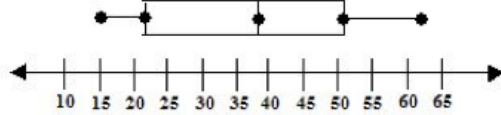

9. Find the lower, middle and upper quartile of the data set below:

3, 4, 4, 5, 6, 8, 8

BOX AND WHISKER PLOTS

ANSWER KEY

1. A box-and-whisker plot shows the **variability** of data along a number line.

2. To make a box-and-whisker plot, you use values called **quartiles**.
3. Quartiles divide data into **4** equal parts.
4. They are related to medians, which divide data into **2** equal parts.
5. The **second** quartile is the median of ALL the data.
6. The **first** quartile is the median of the lower half of the data.
7. The **third** quartile is the median of the upper half of the data.
8. Find the lower, middle and upper quartile of the data set below:

1, 1, 3, 4, 5, 6, 6, 7, 8, 9, 10

Q1= 3 Q2=6 Q3=8

9. Find the lower, middle and upper quartile of the data set below:

3, 4, 4, 5, 6, 8, 8

Q1= 4 Q2=5 Q3=8

Steps to Make Box and Whisker Plots

Step 1:

Find the lower, middle and upper quartile of the data set.

Step 2:

On a number line, mark the greatest and the least value. Also, mark the quartiles.

Step 3:

Step 3: Draw a box from the lower quartile to the upper quartile.

Step 4:

Mark the median value with a vertical segment.

Step 5:

Draw whiskers from the box to the least and greatest values.

Steps to Make Box and Whisker Plots

Step 1:

Find the lower, middle and upper quartile of the data set.

Step 2:

On a number line, mark the greatest and the least value. Also, mark the quartiles.

Step 3:

Step 3: Draw a box from the lower quartile to the upper quartile.

Step 4:

Mark the median value with a vertical segment.

Step 5:

Draw whiskers from the box to the least and greatest values.

Box-and-Whisker Practice

Make a box-and-whisker plot using the data sets below:

4, 6, 6, 7, 12, 6, 9, 8, 2, 7, 4

12, 14, 15, 17, 17, 13, 15, 10, 11, 5

Box-and-Whisker Practice

Make a box-and-whisker plot using the data sets below:

4, 6, 6, 7, 12, 6, 9, 8, 2, 7, 4

12, 14, 15, 17, 17, 13, 15, 10, 11, 5

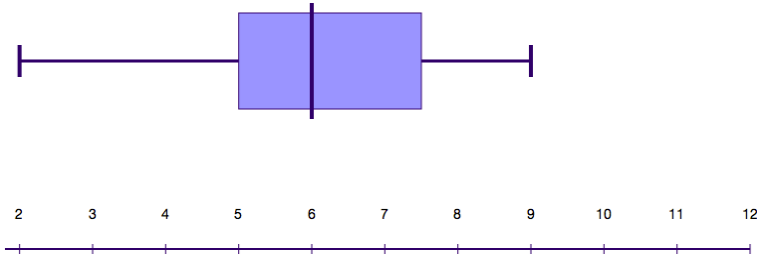

Box-and-Whisker Practice

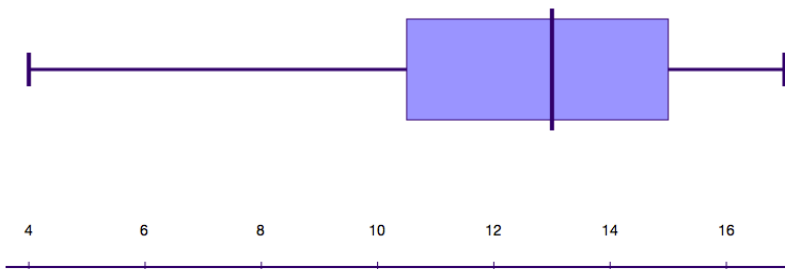

ANSWER KEY

Make a box-and-whisker plot using the data sets below:

4, 6, 6, 7, 12, 6, 9, 8, 2, 7, 4

12, 14, 15, 17, 17, 13, 15, 10, 11, 5

Box and Whisker Plot

Double Dice Practice

Task #1

Roll the double dice. Add the two numbers together. Repeat 24 more times, so that you have 25 data items.

Task #2

Identify the first quartile, second quartile and third quartile..

Task #3

Create a box-and-whisker plot using your data

Task #4

Find the range, mean, median and mode of the data set.
