

Trigonometry - Finding a Side (cos) (Sheet 1)

© FREEFALL MATHEMATICS - FREEFALL MATHEMATICS VELOCITY BOOK 4 - LICENSED FOR SCHOOL USE ONLY - ISBN 978-0-9925361-1-4

Label these sides 'A', and 'H'.

Calculate these, answer to 1 d.p.

4 $\frac{57}{\cos 36^\circ} = \underline{\hspace{2cm}}$

5 $\frac{102}{\cos 8^\circ} = \underline{\hspace{2cm}}$

Calc: $57 \div \cos 36 =$

6 $94 \cos 36^\circ = \underline{\hspace{2cm}}$

Calc: $94 \cos 36 =$

7 $\frac{40.4}{\cos 19^\circ} = \underline{\hspace{2cm}}$

8 $\frac{655}{\cos 42^\circ} = \underline{\hspace{2cm}}$

9 $0.2 \cos 28^\circ = \underline{\hspace{2cm}}$

Calculate the side length.
Answering to 1 decimal place.

Now 'x' (the term) is on the bottom

Trigonometry - Finding a Side (cos) (Sheet 2)

© FREEFALL MATHEMATICS - FREEFALL MATHEMATICS VELOCITY BOOK 4 - LICENSED FOR SCHOOL USE ONLY - ISBN 978-0-9925361-1-4

Find the side length (1 d.p.).
All are sin, but are a mix of 'x on top' and 'x on the bottom'.

1

$$\cos \boxed{} = \frac{\boxed{}}{\boxed{}} \begin{matrix} A \\ H \end{matrix}$$

$$x = \boxed{} \cos \boxed{}$$

$$x = \boxed{} \text{ cm } 1 \text{ d.p.}$$

2

$$\cos \boxed{} = \frac{\boxed{}}{\boxed{}} \begin{matrix} A \\ H \end{matrix}$$

$$y = \frac{\boxed{}}{\cos \boxed{}}$$

$$y = \boxed{}$$

Remember the units

3

$$\cos \boxed{} = \frac{\boxed{}}{\boxed{}}$$

$$p = \boxed{} \cos \boxed{}$$

$$p = \boxed{}$$

7

Answer these using your cos trig skills. Find the lengths to 1 decimal place.

A boat is moored to a jetty. The rope is 6.2 m long and the angle of the rope is 24°. Label sides 'A' & 'H'.

8 Calculate the distance 'x' of the boat from the jetty.

A flag pole has a guy wire attached to it which is secured to the ground 6 m from the pole. The guy wire makes an angle of 51° with the ground.

9 Write 'd' as the length of the guy wire. Write the distance and angle in the two boxes on the diagram.

10 Label the distances 'A' and 'H' then calculate the length of the guy wire.
